

Prof. Godelieve Gheysen from the Department of Molecular Biotechnology, Ghent University, Belgium taught batch 33th students of the Advanced BSc Program in Biotechnology

Prof. Godelieve Gheysen was invited by the Rectorate of Can Tho University for a visit at BiRDI starting from 27/3/2011 in connection with the Advanced BSc Program in Biotechnology. Here she held lectures in Molecular Biology for batch 33th students of the program and gave a seminar entitled “Using molecular markers in plant breeding” to the BiRDI staffs and students.

Prof. Gheysen had a meeting with Assoc. Prof. Ha Thanh Toan (Vice Rector of CTU) and Dr. Tran Nhan Dung (Director of BiRDI) and other BiRDI staffs in the afternoon of 1/4/2011 regarding results of the RIP project (a collaborative project between CTU and VLIR on rice brown plant hopper). Here she also discussed future collaboration for establishing a PhD program in Application of Biotechnology in Plant Breeding at the Mekong Delta of Vietnam.

The meeting of Prof. Gheysen (second, right) with Assoc. Prof. Ha Thanh Toan (fourth, right), Dr. Tran Nhan Dung (third, right), and the BiRDI staffs

Prof. Gheysen visited greenhouses of the rice brown plant hopper project.

Prof. Gheysen (first, left), Dr. Tran Nhan Dung (first, right), and Dr. Tran Thi Xuan Mai discussed their working program.
